### Projects

#### Talking Pet App (Capstone Project | Full-Stack Developer Bootcamp)

- Built a **Mobile Responsive Web** app that allows users to create social media profiles for their pets, post pictures, and generate memes with captions through the app's functions.
- Used **Miro** to brainstorm and create wireframes to define user flows and app structure.
- **Managed tasks** and tracked progress using **ClickUp**, fostering smooth collaboration in an **Agile/Scrum** environment and contributing to the design, development, and testing phases.
- **Collaborated** with teammates in a **hybrid** setting. With in-person and online meetings, using **Slack** and **Zoom** for virtual communication and bi-daily **stand-ups**.
- Developed the app using **HTML5, TypeScript, JavaScript, CSS, Tailwind CSS, React, Express, Node.js, and Next.js** to ensure functionality and responsiveness.
- Managed version control, testing, and deployment using **Git, Terminal/Command-line, WebStorm, PostgreSQL, Insomnia, and Docker** for seamless integration and a robust solution.
- **Tested and debugged** the app throughout the development process, ensuring functionality, performance, and a **seamless user experience**.

#### Game Design Project (Group project | UX/UI Bootcamp)

- **Collaborated** with teammates to design a game, creating **custom assets** and **engaging storylines** using **Adobe Illustrator**.

- **Conducted user research** and feature testing to enhance player engagement and overall user experience.
- Utilized **Miro** and **Figma** for **wireframing** and **prototyping**, transforming concepts into a **functional design**.
- **Managed** team tasks and progress using **Trello**, ensuring timely project completion.

---

## Education
